

## **Winterizing Your Properties**

1. Winterize the irrigation system. Blow out all the lines.
2. Drain and turn off all outside water spigots.
3. Remove the exterior backflow irrigation device and store.
4. Walk the property with snow service provider. Discuss crew and equipment requirements.
5. Place snow markers at handicap areas, fire hydrants, sewer inlets, speed bumps, and difficult to plow areas.
6. Check outdoor lighting.
7. Prune shrubs and trees away from cooling units, signs, lights and buildings.
8. Complete final leaf removal before the first snow event.
9. Complete final mowing and trimming.
10. Winterize outdoor ponds or fountains.
